Advancing Human Assessment Randy E. Bennett 2017-10-17 This book is open access under a CC BY-NC 2.5 license. This book describes the extensive contributions made toward the advancement of human assessment by scientists from one of the world's leading research institutions, Educational Testing Service. The book's four major sections detail research and development in measurement and statistics, education policy analysis and evaluation, scientific psychology, and validity. Many of the developments presented have become de-facto standards in educational and psychological measurement, including in item response theory (IRT), linking and equating, differential item functioning (DIF), and educational surveys like the National Assessment of Educational Progress (NAEP), the Programme of international Student Assessment (PISA), the Progress of International Reading Literacy Study (PIRLS) and the Trends in Mathematics and Science Study (TIMSS). In addition to its comprehensive coverage of contributions to the theory and methodology of educational and psychological measurement and statistics, the book gives significant attention to ETS work in cognitive, personality, developmental, and social psychology, and to education policy analysis and program evaluation. The chapter authors are long-standing experts who provide broad coverage and thoughtful insights that build upon decades of experience in research and best practices for measurement, evaluation, scientific psychology, and education policy analysis. Opening with a chapter on the genesis of ETS and closing with a synthesis of the enormously diverse set of contributions made over its 70-year history, the book is a useful resource for all interested in the improvement of human assessment.

Social Studies for Secondary Schools Alan J. Singer 2003-04-02 Social Studies for Secondary Schools: Teaching to Learn, Learning to Teach, Second Edition integrates discussions of educational goals and the nature of history and social studies with practical ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme woven throughout the text is that what we choose to teach and the way we teach reflect our broader understanding of society, history, and the purposes of social studies education. Each chapter opens with a broad question about social studies education; provides many examples of lessons, including lesson ideas developed by new and experienced middle school and high school social studies teachers; features a rich variety of teaching, learning, and classroom activities designed to provoke discussion and illustrate different approaches to teaching social studies; and concludes with essays about related social studies topics. Part I focuses on philosophical issues, social studies goals and standards, and the design of social studies curricula. Part II examines and offers examples of strategies for planning units and lessons. Part III explores topics, such as thematic and interdisciplinary teaching, a project approach to social studies, as well as assesses student learning and one's own performance as a teacher, and provides a guide to social studies resource materials and organizations. New in the Second Edition: *Every chapter has been updated and includes a number of new lesson ideas. *The lesson ideas are designed especially to help beginning teachers address learning standards; work in inclusive settings; and promote literacy and the use of technology in social studies classrooms. *Sample activities developed with members of the Hofstra New Teachers Network reflect the current focus on document-based instruction and assessment, and can serve as tools for assessing student learning. *Increased attention is given to project-based social studies instruction and to multicultural education. Intended as a text for undergraduate and graduate preservice social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

Learning from Urban Immigrant Youth About Academic Literacies Jie Y. Park 2018-05-15 This book reports on a two-year long, qualitative literacy case study of the academic literacies of first and second-generation immigrant youth in an afterschool tutoring program in South Bronx, New York. Through transcripts of tutoring sessions, interview data, and youths' written work, each chapter highlights how youth interpreted and navigated various school assignments, and what resources and perspectives they brought to unpacking the meaning and significance of texts and disciplinary discourses. By focusing on the immigrant youth themselves, and not on the teaching that happens (or does not happen) inside classrooms, this volume provides a unique and much-needed vantage point to understanding the academic literacies and engagement of urban immigrant youth.

Social Studies for the Twenty-First Century Jack Zevin 2015-01-09 Now in its 4th edition, this popular text offers practical, interesting, exciting ways to teach social studies and a multitude of instructional and professional resources for teachers. Theory, curriculum, methods, and assessment are woven into a comprehensive model for setting objectives; planning lessons, units, and courses; choosing classroom strategies; and constructing tests for some of the field's most popular and enduring programs. The reflective and integrative framework emphasizes building imagination, insight, and critical thinking into everyday classrooms; encourages problem-solving attitudes and behavior; and provokes analysis, reflection, and debate. The text includes separate chapters on teaching each of the major areas of the social studies curriculum. Throughout the text, all aspects of curriculum and instruction are viewed from a tripartite perspective that divides social studies instruction into didactic (factual), reflective (analytical), and affective (judgmental) components. These three components are seen as supporting one another, building the groundwork for taking stands on issues, past and present. At the center is the author's belief that the heart and soul of social studies instruction, perhaps all teaching, lies in stimulating the production of ideas; looking at knowledge from others' viewpoints; and formulating for oneself a set of goals, values, and beliefs that can be explained and justified in open discussion. New in the Fourth Edition: Clear links to the The National Council for the Social Studies College, Career and Civic Life C3 Framework for Social Studies State Standards Attention to impact of high-stakes testing, Common Core State Standards, and related ongoing developments Expanded and critical review of the use of internet, web, and PowerPoint technologies Coverage of how to incorporate the many social science, humanities, and STEM fields to enrich the social studies Updates and revisions throughout, including new research reports reflecting current findings, new examples, more media and materials resources, particularly digital resources, new and updated pedagogical features Companion Website - new for this edition

A Handbook for History Teachers James A. Duthie 2012 History is not a mere chronicle of facts, but a dialogue between competing interpretations of the past; it should be taught as such. The book includes the rationale for the study of history, the specific thinking skills required by the discipline, and methods for students acquiring, processing, and applying information.

The Decay of Truth in Education Kevin S. Krahenbuhl 2018-04-18 Why has the spread of 'fake news' taken grip on society so quickly? Why has there been a significant increase in violence among those who disagree on issues? Why is it that increasingly our society is shutting down speech they disagree with rather than engage in civil debate? This book explores each of these issues and traces their connection to the same root cause: the decay of truth in education. It presents a compelling case that documents how educational institutions and political institutions alike have abandoned truth as a primary virtue. In doing so, our society has waded deeply into an environment loaded with deceit, distraction, and delusion. The targets of this critique range across political, religious, and social groups as this is a societal-level outcome of the educational malaise towards truth. The book underscores topics of practical interest and considers real opportunities for each individual to take to help restore truth as a virtue in education and in society.

Haladyna 2013-07-18 Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response (multiple-choice) items with constructed-response formats. This trend is expected to continue. As a result, a new item writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author's previous book, *Developing and Validating Multiple-Choice Test Items*, 3e (Haladyna, 2004). That book achieved distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include ... Comprehensive and Flexible – No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity – Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing, currently under revision by AERA, APA, and NCME Illustrative Examples – The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research – A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors.
