enthusiast considering which lens would be suitable to add to his outfit. Do you know your "Coma from your Aberrations"? If "Yes," then part 2 of Erwin Puts' new book will be of considerable interest to you. Either way you may find this section easier to understand than you expect; the illustrations and diagrams do help. Part 1 goes into the optical history of E. Leitz, Wetzlar and the Leica Camera of Solms in detail with all the personalities involved. This section is well illustrated with some new pictures. The commercial demands are always battling

with the perfectionists at Leica who created some of the world's most famous lenses. Part 2 is an optical digression explaining the lens and glass design features, problems and terms and the continual battle to ensure that Leica users end up with the highest possible standard of lens. Part 3 is the largest part of the book. Puts has tested Leica lenses from 1925 to date; each lens, in most cases with diagram, is detailed with its performances at the critical apertures.

### **The Mutant Project** Eben

Kirksey 2020-11-10 An anthropologist visits the frontiers of genetics, medicine, and technology to ask: Whose values are guiding gene editing experiments? And what does this new era of scientific inquiry mean for the future of the human species? "That rare kind of scholarship that is also a page-turner." —Britt Wray, author of *Rise of the Necrofauna* At a conference in Hong Kong in November 2018, Dr. He Jiankui announced that he had created the first genetically modified babies—twin girls named Lulu and Nana—sending shockwaves around the world. A year later, a Chinese court sentenced Dr. He to three years in prison for "illegal medical practice." As scientists elsewhere start to catch up with China's vast genetic research program, gene editing is fueling an innovation economy that threatens to widen racial and economic inequality. Fundamental questions about science, health, and social justice are at

stake: Who gets access to gene editing technologies? As countries loosen regulations around the globe, from the U.S. to Indonesia, can we shape research agendas to promote an ethical and fair society? Eben Kirksey takes us on a groundbreaking journey to meet the key scientists, lobbyists, and entrepreneurs who are bringing cutting-edge genetic engineering tools like CRISPR—created by Nobel Prize-winning biochemists Jennifer Doudna and Emmanuelle Charpentier—to your local clinic. He also ventures beyond the scientific echo chamber, talking to disabled scholars, doctors, hackers, chronically-ill patients, and activists who have alternative visions of a genetically modified future for humanity. The Mutant Project empowers us to ask the right questions, uncover the truth, and navigate this brave new world.

*Hell's Angels* Hunter S.

Thompson 2012-08-01 Gonzo journalist and literary roustabout Hunter S. Thompson flies with the angels—Hell's Angels, that is—in this short work of nonfiction. "California, Labor Day weekend . . . early, with ocean fog still in the streets, outlaw motorcyclists wearing chains, shades and greasy Levis roll out from damp garages, all-night diners and

cast-off one-night pads in Frisco, Hollywood, Berdoo and East Oakland, heading for the Monterey peninsula, north of Big Sur. . . The Menace is loose again." Thus begins Hunter S. Thompson's vivid account of his experiences with California's most notorious motorcycle gang, the Hell's Angels. In the mid-1960s, Thompson spent almost two years living with the controversial Angels, cycling up and down the coast, reveling in the anarchic spirit of their clan, and, as befits their name, raising hell. His book successfully captures a singular moment in American history, when the biker lifestyle was first defined, and when such countercultural movements were electrifying and horrifying America. Thompson, the creator of Gonzo journalism, writes with his usual bravado, energy, and brutal honesty, and with a nuanced and incisive eye; as *The New Yorker* pointed out, "For all its uninhibited and sardonic humor, Thompson's book is a thoughtful piece of work." As illuminating now as when originally published in

1967, Hell's Angels is a gripping portrait, and the best account we have of the truth behind an American legend.

**Terra Flamma** Stuart Palley  
2018 From the towering pines of Shasta Trinity National Forest, to the chaparral scrub of San Diego's Mexican border, to Yosemite and the Western Sierras, trained wildland firefighter and photojournalist Stuart Palley documents California's raging wildfires and the forces behind them during the state's worst fire season in modern history. The dramatic images, a half-decade in the making, capture the simultaneous beauty and destruction that wildfires bring as fire seasons get longer and more deadly, expensive, and destructive. In the wake of California's record-breaking series of wildfires in 2017, the images encompass five fire seasons and forty-five fires. They are presented chronologically and culminate with the wine country fire siege that devastated Sonoma and Napa counties in October 2017 and the Thomas Fire in Southern California, the largest in recorded state history. This timely book defines the state's drought and urban sprawl

challenges, drawing a broader picture of global warming and its acute effects worldwide.

*An Honest Heart* Kaye Dacus 2013-10-15 Set during the Industrial Revolution and the Great Exhibition of 1851, *An Honest Heart* is a “sitting-room romance” with the feel of a Regency-era novel but the fashions and technological advances of the mid-Victorian age. Featuring dual romance stories, the main plot involves seamstress Caddy Bainbridge and the choice she must make between two men: one from the aristocracy, the other from the working class. Award-nominated author Kaye Dacus pinpoints the theme of honesty—both men in this love triangle have deep secrets to hide, and Caddy’s choice will be based on which of them can be

honest with her. Courtship . . .

cunning . . . candor. Who
