Engaging with Empowerment Srilatha Batliwala
2015-09-02 In this fascinating collection of writings, Srilatha Batliwala, feminist thinker and practitioner, explores the many dimensions of what empowerment means for, and to, women. Looking back on a life lived through commitment to a cause—rather than to an organisation or to a sector—and working for it at many levels and

locations, she traces the evolution of the concept from the late 1980s till now, unravelling its ambiguities, highlighting insights gained through practice, and analysing how and why it has been depoliticised and reduced by the state and aid agencies. Along the way, Batliwala traverses key sectors, including education for women, politics outside political systems, grassroots movements, energy for sustainable development, and a controversial questioning of a rights-based approach to women's equality.

Leadership for the Twenty-first Century Joseph Clarence Rost 1991 This illuminating study critiques the concept of leadership as understood in the last 75 years and looks to the twenty-first

century for a reconstructed understanding of leadership in the postindustrial era. More similarities in past decades were found than had been thought; the thread throughout Rost's book is that leadership was conceived of as good management. He develops a new definition and paradigm for leadership in this volume that distinguishes leadership from management in fundamental ways. The ethics of leadership from a postindustrial perspective completes the paradigm. The book concludes with suggestions that can be immediately utilized in helping to transform our understanding of leadership.

Developing Distributed Curriculum Leadership in

Hong Kong Schools Edmond Hau-fai Law

2017-04-07 The book aims to explore distributed leadership in developing curriculum innovations in schools with a target of bringing about theoretical underpinnings in the West with the empirical

studies and practices in the East. It examines theoretically the roots of the curriculum leadership studies and practically with the empirical data and case studies in Hong Kong which has been considered a melting pot of the Western concepts and innovations in a land of Eastern cultures. The examination is framed within theoretical frameworks of activity theories, discourse analysis and social network systems. The findings will show the impact of the cultural traditions of Eastern countries in the mediation of the direction of the discourses in teacher meetings and the effectiveness of decision making in the processes of developing school based curriculum leadership. The book is theoretically exploratory with practically examined practices for educational leaders like schools headers and department leaders as well as teachers who aim at asserting greater influence in the educational decision making processes. Dare to Lead Brené Brown 2018-10-09 #1 NEW
Downloaded from [live-careerwise.hosting.mydropwizard.com](https://www.live-careerwise.hosting.mydropwizard.com) on August 10, 2022 by guest

YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Look for Brené Brown's new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us!

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we

lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all

ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, “One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It’s learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It’s why we’re here.” Whether you’ve read *Daring Greatly* and *Rising Strong* or you’re new to Brené Brown’s work, this book is for anyone who wants to step up and into brave

leadership.

A Decade of Research on School Principals Helene Årlestig 2015-11-13 This book provides a unique map of the focus and directions of contemporary research on school leadership since 2000 in 24 countries. Each of these directions has its own particular cultural, educational and policy history.

Taken together, the various chapters in the volume

provide a rich and varied mosaic of what is currently known and what is yet to be discovered about the roles and practices of principals, and their contributions to the improvement of teaching and the learning and achievement of students. The particular foci and methodological emphases of the research reported illustrate the different phases in the development of educational policies and provision in each country. This collection is an important addition to existing international research that has shown beyond any reasonable doubt that the influence of school principals is second only to that of teachers in their capacity to impact students' progress and achievement and to promote equity and social justice.

Educational Leadership Steven J Courtney

2017-08-10 Educational Leadership brings together innovative perspectives on the crucial role of theory and theorising in educational leadership at a

time when the multiple pressures of marketisation, competition and system fragmentation dominate the educational landscape. This original and highly thought-provoking edited collection is a much-needed counterbalance to the anti-theoretical trends that have underpinned recent education reforms. Contributors employ a range of theories in original and innovate ways in order to reveal the lived experiences of what it means to be an educational leader at a time of rapid modernisation, where the conceptual terrain of 'modern' has been appropriated by corporate and private interests, where notions of 'public' are not only hidden, but also derided, and where school leaders must meet the conflicting demands of competing accountabilities. Drawing on research projects conducted in the UK, Educational Leadership presents convincing evidence that the need to consider theory crosses national borders, and the

authors discuss changes to professional identities and practices that researchers around the world will recognise. This detailed and insightful work will appeal to academics, researchers and postgraduate students in the fields of education and sociology, as well as those with an interest in organisational and political theory. The topical subject matter also makes the book of relevance to practitioners and policy-makers in education and the public services more generally.

Curriculum Leadership by Middle Leaders Kelvin Heng Kiat Tan 2016-08-12 Curriculum Leadership by Middle Leaders focusses on major issues relating to the continuing national and international discourse on curriculum leadership, and highlights the vital role of middle leaders in schools. School leadership has focused primarily on first-order

change involving school leaders or principals. This book seeks to put the spotlight on second-order change that involves curriculum leadership and professional development support on the part of middle leaders for more sustainable and long-term change in teaching and learning that will influence what happens in classrooms. With timely and thought-provoking contribution from authors who pursue a range of scholarly interests in multiple educational settings, the book is guided by several underlying questions: How might we re-envision curriculum leadership so that it addresses both local and global concerns and aspirations? How might we better grasp how middle leaders understand and respond to the pressures of educational reform initiatives? How might middle leaders transform pressures into possibilities? This book will appeal to current teachers, those currently undertaking teacher training and students or academics carrying

Action Leadership Ortrun Zuber-Skerritt

2011-04-15 Action leadership is a creative, innovative, collaborative and self-developed way to lead. It eschews the hierarchical structure usually associated with leadership and is based instead on the democratic values of freedom, equality, inclusion and self-realization. It take responsibility for, not control over, people through networking and orchestrating human energy towards a holistic outcome that benefits the common interest. Action leaders are passionate people who abide by the motto that “Learning does not mean to fill a barrel but rather to ignite a flame” in others. And in this time of rapid economic, political, technological, social and ecological changes, action leadership and action leaders are precisely what’s needed to improve how people and organizations engage constructively to address the myriad complex issues challenging

society at all levels. Action Leadership: Towards a Participatory Paradigm explains and illustrates how action leadership can be developed through participatory action learning and action research (PALAR). It addresses real-life issues by people who choose to work collaboratively towards shared goals while developing their learning, insights, knowledge, people skills and personal relationships through involvement in a PALAR project. The book provides a conceptual framework for action leadership and for the integrative, practical theory of PALAR; and examples of applications in higher education, management education for organization development, and community development. Readers are encouraged to adopt, adapt and further develop the evolving concepts of action leadership and PALAR in a participatory paradigm of learning, research and development.

A Comparative Analysis of Traditional Leadership and E-Leadership with Special Reference to IT Industry in India Dr. Kasturi Sahay

Positive Leadership Kim S. Cameron 2012 The first edition introduced the newly emerging field called Positive Organizational Scholarship. Rather than focusing on organizational dysfunction, Positive Organizational Scholarship looks at organizations that are functioning at an unusually high level.

Learning from such successful groups about what they did right forms the backbone of the strategy, because strategies that capitalize on the positive tend to produce life-giving, flourishing outcomes in organizations. The four strategies discussed in the first edition included the cultivation of positive climate, positive relationships, positive

communication, and positive meaning. Each strategy is explained and illustrated. In this revised edition, the author will add the following materials: Chapter 1: Outlining three outcomes associated with positive leadership and one more example. Chapter 2: Adding some empirical findings linking attributes of climate with physiological benefits. Chapter 3: A brief discussion of temporary encounters with positive or negative outcomes. Chapter 4: Additional research on the results of the positive-to-negative-communication-ratio. Chapter 5: Elaboration on the issue of meaningfulness in work. Chapter 6: More ideas for implementation

celebrated societal values and norms. As a result, it is becoming difficult to use the language of leadership without at the same time assuming its essentially positive, intrinsically affirmative nature. Within organizations, routinely referring to bosses as ‘leaders’ has, therefore, become both a symptom and a cause of a deep, largely unexamined new conceptual architecture. This architecture underpins how we think about authority and power at work. Capitalism, and its turbo-charged offspring neo-liberalism, have effectively captured ‘leader’ and ‘leadership’ to serve their own purposes. In other words, organizational leadership today is so often a particular kind of insidious conservatism dressed up in radical adjectives. This book makes visible the work that the language of leadership does in perpetuating fictions that are useful for bosses of work organizations. We do this so that we – and anyone who shares similar discomforts – can make a

start in unravelling the fiction. We contend that even if our views are contrary to the vast and powerful leadership industry, our basic arguments rest on things that are plain and evident for all to see. *Critical Perspectives on Leadership: The Language of Corporate Power* will be key reading for students, academics and practitioners in the disciplines of Leadership, Organizational Studies, Critical Management Studies, Sociology and the related disciplines.

Finding Your Leadership Focus Douglas B. Reeves 2011 In his new book, author and international keynoter Douglas Reeves addresses a major challenge faced by today's school leaders: an ever-growing load of programs and initiatives. Reeves contends that program overload not only taxes leadership resources, but actually hurts rather than improves student performance. Drawing on recent research findings, this book shows how leaders can

pare down from a proliferation of initiatives to determine what is truly most important based on their local concerns, challenges, populations, and other school factors. Identifying a specific set of leadership practices that are more strongly associated with improvements in student achievement, Reeves provides explicit guidelines for how school leaders can improve their most critical leadership decisions by simultaneously engaging in three essential strategies: monitoring teaching and leadership practices, building high degrees of efficacy among staff members, and focusing on a smaller number of priorities. Finding Your Leadership Focus is essential reading for new and veteran principals, teacher leaders, and PLC book study groups.

The global higher education sector has changed

dramatically as universities continue to face unprecedented challenges associated with the COVID-19 pandemic. Many are struggling to navigate this crisis while maintaining high-quality course delivery, ensuring strong student recruitment numbers, and providing clear communication to staff and students. Leadership is increasingly being perceived and theorised as pivotal to students' achievement and institutional performance. In this book, Saeeda Shah considers educational leadership from an Islamic perspective to debate theoretical positions underpinned by Islamic texts and teachings, and the resulting conceptualisations and interpretations.

While educational leadership literature and research have flourished in recent years, this is predominantly informed by Western ideologies, concepts, theories and practices. *Education, Leadership and Islam* focuses on contemporary

In Leadership at Scale, McKinsey experts Claudio Feser, Michael Rennie and Nicolai Nielsen share their secrets on how to increase leadership effectiveness across an organization. Using extensive

research, distilled insights from McKinsey's leadership development work in practice, and lessons from a highly successful leadership development program, this book will focus on the leadership behaviors that matter most.

Responsible Leadership Nicola M. Pless 2012-11-27 These chapters on 'Responsible Leadership' represent the latest thinking on a topic of increasing relevance in a connected world. There are many challenges that still remain when it comes to establishing responsible leadership both in theory and practice. Whilst offering conceptualisations for the improvement of leadership is a first and perhaps easier response, what is more difficult is to facilitate the actual change to happen. These chapters will not only generate interest in the emerging domain of studies on responsible leadership, but also will pave the way for future research in this area in the years to come. of Business Ethics, Volume 98 Supplement 2, 2011
The Psychology of Leadership David M. Messick
2004-09-22 In this book, some of the world's leading scholars come together to describe their thinking and research on the topic of the psychology of leadership. Most of the chapters were originally presented as papers at a research conference held in 2001 at the Kellogg School of Management of Northwestern University. The contributions span traditional social psychological areas, as well as organizational theory; examining leadership as a psychological process and as afforded by organizational constraints and opportunities. The editors' goal was not to focus the chapters on a single approach to the study and conceptualization of leadership but rather to display the diversity of issues that surround the topic. Leadership scholars have identified a host of approaches to the study of leadership. What are the personal characteristics of

leaders? What is the nature of the relation between leaders and followers? Why do we perceive some people to be better leaders than others? What are the circumstances that evoke leadership qualities in people? Can leadership be taught? And so on. The contributions to this book examine these important questions and fall into three categories: conceptions of leadership, factors that influence the effectiveness of leadership, and the consequences and effects of leadership on the leader. All in all, the chapters of this volume display part of a broad spectrum of novel and important approaches to the study of the psychology of leadership. We hope that they are equally useful to those who are or would be leaders and to those who study the topic. As recent events have served to remind us, it is too important a topic to be ignored by psychologists.
